Testing Methodologies: Manual Testing, Agile (Scrum, BDD)

Experience

Software Test Engineer   Aug 2022 – Present

Lifeline Systech Solutions Pvt. Ltd., Pune

– Collaborated in Agile-Scrum teams to ensure product quality across modules.

– Designed automation suites, conducted functional & non-functional testing, and performed API validations.

– Delivered stakeholder demos, mentored junior testers, and improved defect resolution efficiency.

Projects

Whizible (Aug 2022 – Sep 2024)

Domain: Service Execution Management / Project Management

Environment: Selenium, TestNG, Postman, Swagger, JIRA, JMeter, Burp Suite, Agile-Scrum

– Designed & executed 300+ test cases ensuring complete coverage and defect prevention.

– Automated regression suite in Selenium + TestNG, cutting cycle time by 40%.

– Performed API testing (Postman, Swagger), validated payloads & error handling.

– Conducted regression, smoke, integration & mobile testing, ensuring release stability.

– Applied JMeter & Burp Suite for performance and VAPT validations.

– Worked with developers and stakeholders; presented demos & UAT validations.

Initiative Management (Sep 2024 – Present)

Domain: Enterprise Initiatives & Workflow Automation

Environment: API backend (REST), Load Testing, Security Testing, CRSS, Mail Integrations

- Tested migration to new technology stack, validating all base product functionalities and security compliance.

- Performed backend API testing including load testing & security validations.

- Validated quick notification feature for initiative creation and tracking.

- Tested mail-based approvals (approve/reject from inbox & watchlist), ensuring seamless workflow.

- Verified initiative health sheet with CRSS, ensuring data accuracy & real-time project health monitoring.

- Collaborated with developers on bug fixes & feature enhancements, reducing turnaround time.

Education
